

MONTERO

—GO WILD. BE BOLD.—

KING OF TERRAINS

BORN WILD, RAISED WITH ELEGANCE

The ultimate performance and high quality features in one package. The one-and-only all-round SUV of its kind, the new Montero will satisfy your driving desire in any scene; riding the city streets, cruising the night out on the town, or diving into the wild off-road. Experience a whole new level of exclusive - a promise of a life, bold and elegant.

POWER AND PERFORMANCE IN MOTION

Comfortable and inviting, the interior of Montero is a far cry from the terrain it was designed to face. Illuminated meters and leather-wrapped controls are all ergonomically arranged and awaiting your command, while the soft leather seats and luxurious appointments throughout tempt you to forget your destination and simply keep driving.

ENGINE PERFORMANCE

The control that put Montero in the Dakar Rally record books didn't come by skimping on engine power. The rugged outdoors are unforgiving on those who show up unprepared, which is why Montero comes with suitable engine to provide ample power for all conditions.

3.2L 16-valve DOHC COMMON RAIL DI-D

The 3.2-litre DI-D (Direct Injection Diesel) engine provides superior torque, especially at low and mid rev ranges. The Common Rail injection system electronically controls fuel intake to deliver precisely the right amount to each cylinder, while the direct injection system enables far more efficient combustion for better fuel efficiency and reduced emissions.

3.2-liter DOHC 16-valve
Common Rail DI-D (4M41)
Performance Curves

Common Rail Fuel System

The critical factor in precision diesel engines is pressure. By using a Common Rail to supply fuel injector lines, a single pump can provide constant high fuel pressure. In addition, the ECU electronically controls fuel flow to allow three injections with every cycle, maximizing power output while minimizing waste and emissions.

Cyclone-type Pre-air Cleaner

To perform at its best, an engine needs a continuous flow of clean air. The pre-air cleaner increases air intake while filtering out dust and moisture. With the engine breathing easy, Montero is ready to take on any road.

MINIMUM TURNING RADIUS 5.7 m

SAFETY AND RELIABILITY

Mitsubishi knows that sometimes the road throws an unexpected surprise in your path, so Montero is outfitted with an array of advanced active and passive safety technologies. Enjoy your drive with the peace of mind of knowing that you and your passengers are safe and secure.

MONOCOQUE BODY WITH BUILT-IN LADDER FRAME

The strength of Montero's ladder frame has been nearly tripled over previous designs, providing even better resistance to torsional and flexural stresses without any further increase in weight. This rigidity translates to better handling and comfort over difficult road conditions and lower chance of control loss.

Dual-stage SRS Airbag System, Side and Curtain SRS Airbags

In the event of a forward collision, the driver and front passenger are both protected by front SRS airbags. To further increase safety, the onboard computer measures the force of impact and adjusts airbag deployment speed to best reduce the chance of injury to occupants. For side collisions, the driver and front passenger are protected by side mounted airbags set to deploy at just the right position regardless of seat position. Furthermore, curtain airbags mounted in the ceiling lining deploy to protect front and 2nd-row occupants.

Automatic High Beam System

This in-vehicle camera sensor continuously monitors headlamps and tail lights of oncoming and preceding vehicles. If a nearing vehicle is detected by the camera sensor, the Automatic High Beam System automatically switches to low beam. Once there are no oncoming or preceding vehicles with headlamps or tail lights turned on in close proximity, the system immediately reverts back to high beam. Without the need for manual operation, driving is even more safe and comfortable.

Premium Security Alarm System

This theft protection system has been improved from earlier models. It is equipped with sensors to detect inclination and intrusions. In addition, the built-in battery power back-up activates an alarm when the battery wire is detached to prevent illegal access.

LED Daytime Running Lamp With Position Lamp

Beyond enhancing safety by increased visibility when driving during the daytime, the LED daytime running lamps add a touch of style for good measure.

RISE Body

Using front and rear crumple zones to absorb and diffuse collision damage before it can reach the cabin interior, Montero's RISE (Reinforced Impact Safety Evolution) body design is built to minimize occupant injury regardless of which direction trouble comes from. The rigid monocoque body provides further protection by encasing occupants within a steel framework that resists damage.

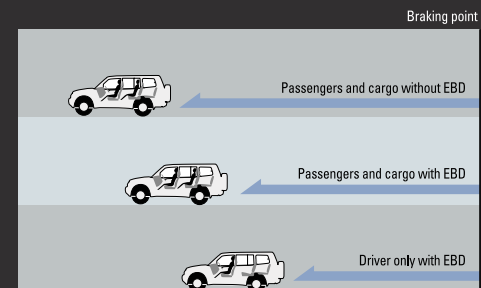

Safety-design Fuel Tank

Positioned ahead of the rear axle to help prevent leakage in a collision, Montero's fuel tank is also guarded by a tough resin underprotector.

Multi-mode ABS (Anti-lock Braking System)

When the road throws you an unexpected curve, ABS ensures that you'll be ready. The 4-sensor, 4-channel system is matched to each SS4 II mode to ensure skid-free braking regardless of surface conditions.

EBD (Electronic Brake-force Distribution)

EBD modulates each braking channel independently, providing additional force to the rear wheels when the vehicle is carrying passengers or cargo. This ensures you are able to come to a stop quickly and safely, regardless of load or road conditions.

AWC (All Wheel Control)

More than a technology, All Wheel Control is our guiding philosophy. Incorporating an array of innovative systems into an integrated performance and control network, AWC delivers precise traction, power and slip control for each wheel independently to ensure complete driver control even in extreme handling conditions.

- 4-wheel Traction Control
- Monocoque Body with Built-in Ladder Frame
- Front Midship Layout
- Independent Suspension

- 4-wheel Slip Control
- Multi-mode ABS + EBD
- ASTC and Rear Differential Lock
- Independent Suspension

Monocoque Body with Built-in Ladder Frame

By incorporating a lightweight and highly rigid monocoque body with a built-in ladder frame that provides added resistance to torsion and flexing and fixing them atop a dynamic independent suspension, Montero achieves an unprecedented combination of all-terrain control and luxury-sedan comfort.

Front Midship Layout

The engine on Montero has been shifted back closer to the center of the vehicle. This places more weight between the axles to greatly improve handling and control. In addition, the engine position allows a better approach angle and provides added crumple zone protection in the event of an accident.

**Front
Double-wishbone Suspension**

**Rear
Multi-link suspension**

Independent Suspension

Montero's rally-proven all-wheel independent suspension gives drivers confident, predictable handling in even the most unpredictable road conditions. The front double-wishbone and rear multi-link suspensions use coil springs to provide quick and natural response, especially when cornering.

Each wheel can raise, lower and pivot independently, keeping more tyre surface against the ground for greater stability

Suspension Travel

The independent suspension, coil springs and monocoque body all work together to provide a greater degree of suspension travel. The result is impressive road-handling and greater stability even over the roughest off-road conditions.

ASTC (Active Stability and Traction Control)

ASTC utilizes a network of control units and intelligent sensors to monitor vehicle status as well as the driver's steering. As road and vehicle conditions change, ASTC manages the forces on all wheels by precisely controlling engine torque and braking force going to each one, providing improved vehicle control, trace ability and traction in all driving conditions.

In understeer, ASTC determines appropriate yaw rate and applies braking force to the inner rear wheel to prevent drift-out and ensure better trace control.

ASTC calculates real-time vehicle status via sensor data. Whenever the potential for oversteer or understeer in corners is detected, ASTC determines the correct yaw for Montero and applies braking force to the appropriate wheels.

In oversteer, ASTC determines appropriate counter yaw moment and applies braking force to the outer front wheel to prevent spinout and ensure better trace control.

Rally-proven Technologies

Mitsubishi's advanced control technologies were first conceived and developed to meet the challenges of the world's most grueling rally courses. Proven under real-world conditions more demanding than any test track, they are now ready to go into Mitsubishi vehicles like Montero.

INVECS-11 AT provides a smoother, more active driving feel while also improving fuel efficiency. It has been programmed with suitable shift patterns for a wide range of road conditions. Drivers may also select the D-Range setting, which duplicates the shift timing of an average driver for a natural driving feel that reduces fuel consumption.

Super Select 4WD II (SS4 II)

Montero's advanced SS4 II lets you shift between 2H, 4H, 4HLc and 4LLc modes at speeds of up to 100km/h, providing on-demand control for highway performance or off-road traction whenever you need it.

Sports Mode for AT

Standard on all AT models, Sports Mode delivers the excitement of a manual shift while still providing the convenience of an automatic. Changing gears for enhanced response and performance with just a touch of the shifter, Sports Mode reminds you of what driving was like back when you first learned how.

2H (2WD high range)
For cruising down the highway or just making a quick trip across town, 2H mode shifts you into rear-wheel drive for smooth, quiet, fuel-efficient performance.

4H (4WD high range)
When the weather gets bad and the roads start turning rough, 4H mode provides added traction. The dynamic front/rear torque split adjusts between 33:67 and 50:50 to give you greater control for high speed driving.

4HLc (4WD high range with locked center differential)
Keeping you on track even in rugged or slippery conditions, the 4HLc mode distributes power to all four wheels equally for off-road excitement with a steady sense of control.

4LLc (4WD low range with locked center differential)
Switch to 4LLc mode when you need all the tractor-like crawling power Montero is capable of. Maximized low-end torque pulls you through even the roughest terrain, stickiest mud and deepest snow.

TRENDY SPORT

As sleek as it is spacious, Montero's expansive interior delivers a ride of luxurious comfort for you and your passengers. Providing ample head and legroom for up to seven occupants, Montero also features versatile seating arrangements to match your carrying needs. The third-row seats can be easily stowed under the floor to create a wide, flat storage space ideal for suitcases, or removed completely to give you a convenient underfloor compartment. For even larger items, the second-row seats can also be folded down to provide enough space for nearly anything you want to bring.

MAKE YOUR OWN SPACE

Every day brings new destinations, new friends, and new adventures. You don't want to be stuck in someone else's rigid assumptions of where to go and what to do. Montero understands, and provides you an interior as versatile as it is roomy, with plenty of seating and storage options for work, fun or daily life.

Power Tilt & Sliding Sunroof

The power tilt and sliding sunroof comes with an anti-trapping function as well.

To provide as much carrying space as possible, the 2nd-row can have the seatbacks folded down, and then the seats themselves folded up and out of the way. You can also fold down just one part of the 60:40-split 2nd-row for carrying extra long cargo.

The 3rd-row seats can be easily folded up and stowed away in Montero's underfloor compartment, then unfolded again when you need the extra seating capacity. This gives you plenty of room for groceries, suitcases or bulky cargo.

With the 3rd-row stowed, the 1st and 2nd-rows can be laid flat, creating a comfortable sleeping area.

The 2nd-row has a 60:40 split, allowing you to carry extra-long cargo while still seating four comfortably. (GLS only)

Fold up the 2nd-row as well to make full use of Montero's massive carrying capacity.

PREMIUM ENTERTAINMENT

Few things are as fun as listening to your favourite tunes as you head down the road. Now you can enjoy them as never before with Montero's powerful Rockford Acoustic Design® premium sound system that turns the entire cabin into a concert hall.

Rockford Acoustic Design Premium Sound System

This system consists of 12 speakers, including tweeters, woofers and subwoofers. Positioned throughout Montero, they are optimally balanced for automotive listening.

Audio Controls on Steering Wheel

For convenience and safety, stereo controls are built into the steering wheel, allowing the driver to adjust the sound system with both hands on the wheel.

860W High Power Amp and 12-speaker System

The powerful amplifier and high quality speakers are capable of producing all the power and clarity of a home sound system, giving you complete music enjoyment everywhere you go. Output levels can even be automatically balanced for different music styles, and can also be centered on individual passenger positions.

5.1 Channel Theater Surround Sound

The 5.1-channel theater surround sound system balances front and rear speakers with the powerful subwoofer to create the feeling of being right in the center of the action. The sound balance can be adjusted to focus on the front seats or the 2nd-row, or to provide an even balance for the whole interior.
