

# Are you maintaining your car?

Is your car in the best possible condition?

You may notice that your car is having problems lately. Have you recently performed any maintenance? Performance decreases over time, and if neglected, serious problems may occur. As the owner, you are responsible for making sure that it operates correctly.

Appropriate maintenance will keep your car in the best condition

By caring for your car, you can keep it in good condition. Simply replacing wear-and-tear parts and items will improve the ride comfort and driving performance. You will once again have that feeling of when you first drove it.

## What happens if you do not replace the wiper blades?

**1** When the days are sunny, you might forget the importance of wiper blades.

**2** Maybe you know that you need to replace the wiper blades, but you don't replace them because you are not thinking about them right now.

**3** Then, a sudden and heavy rain occurs when you are driving.

**4** It is very dangerous to drive a vehicle in the rain with poor wiper blades.

### Why does this happen?

The rubber of the wiper blade is a consumable part and needs to be periodically replaced. It deteriorates due to exposure to strong sunshine, wind and temperature fluctuations. In addition to the rubber, the wiper frame also deteriorates. Have the wiper frames checked when you replace the rubber, and replace them if necessary.

### When to replace the Wiper Blades

The time to replace the wiper blades depends on the condition of the wipers. There are several factors that can affect to the wiping performance, for example, deterioration of rubber and wiper frame, improper installation of rubber to wiper frame and others. We recommend that you periodically bring your car to a Mitsubishi authorized dealer for an inspection.

## Good reasons to use Mitsubishi Genuine Parts

### Using Genuine Wiper Blades makes a big difference

When using the wiper blades in severe conditions, there is a noticeable difference in performance when Genuine Parts are used.

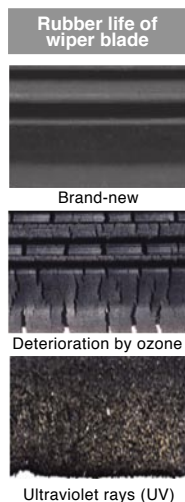

Mitsubishi Genuine Wiper Blades have:

1. Smooth wiping due to the best fit
2. An anticorrosive coated frame for high quality

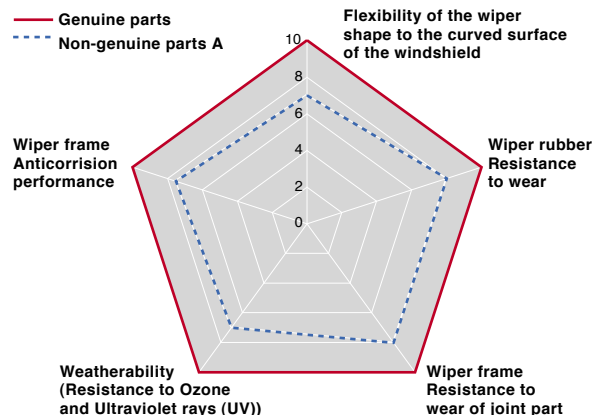

It is possible to wipe more than 500,000 times and still maintain their high-quality performance. The total wiping area is equivalent to the area of 56 soccer grounds.

### Genuine Parts provide confidence

The difference between genuine and non-genuine parts is not only the quality of the wiper blade itself, but also the best match to Mitsubishi vehicles. The Mitsubishi Genuine Wiper Blades are designed to be the best fit for Mitsubishi vehicles.

### Wear comparison chart of genuine and non-genuine parts

The performance of genuine parts is set as 10 points, which is the highest point total. Higher point levels indicate a higher performance.
